

Characterization Methods Workshop

11 - 22 March 2019

Çanakkale Onsekiz Mart University Science and Technology
Application and Research Center

For members of the
Tunisian Chemical Society,
registrations fees are only:

100 Euros

Course Topics:

- Advanced 3D imaging and structural characterization techniques with coupled AFM-RAMAN
- High resolution imaging of surfaces via SEM
- High precision composition analysis with ICP-OES
- High precision chemical constituent analysis with LCMS/MS
- Thermal and thermo-mechanical properties of materials via TGA and DMA
- Gathering structural details of molecules via Liquid State NMR
- Gas Chromatography Device Components and Applications

Venue:

Çanakkale Onsekiz Mart University Science and Technology Application and
Research Center (ÇOBİLTUM). Çanakkale, Turkey

Workshop Fee: 1000 EUR

Contact Person: Assoc. Prof.Dr. Volkan Eskizeybek
